

**Hycult<sup>®</sup>Biotech**

Let's improve **health**

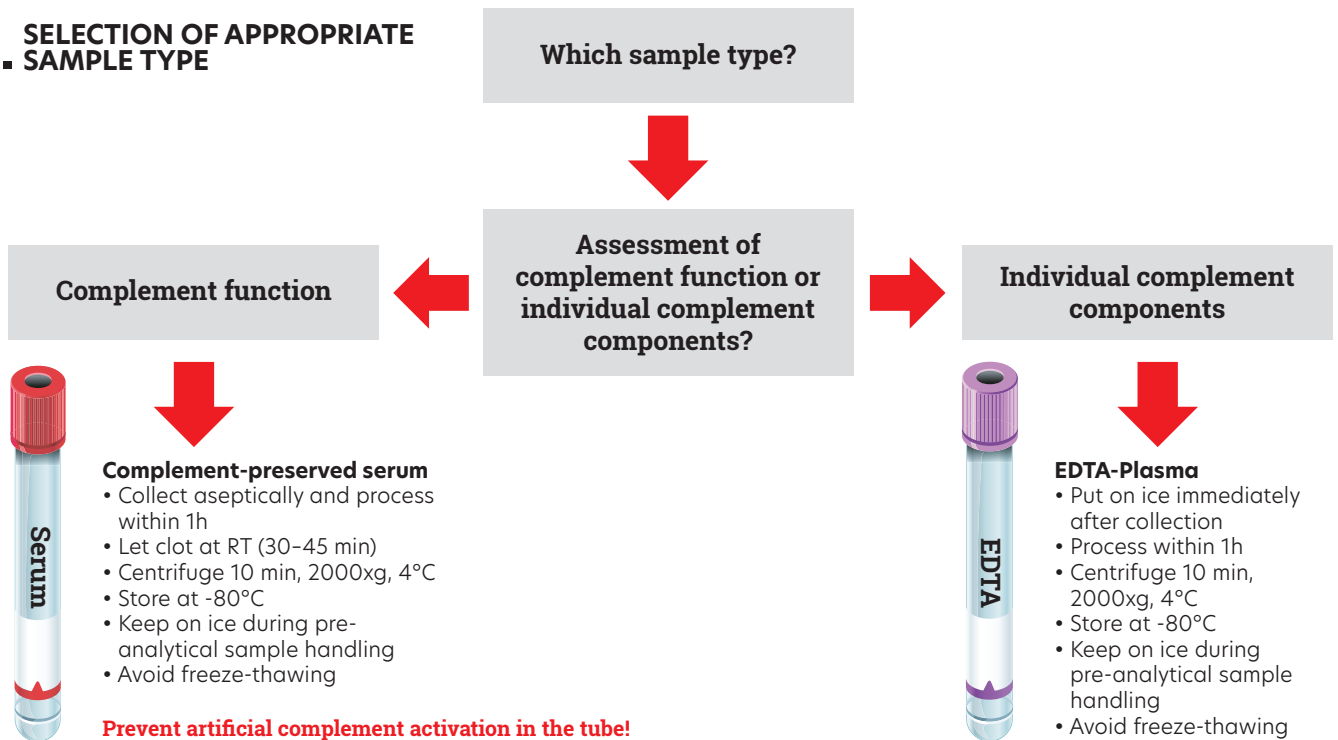

# **Tools for complement research**

Together, we improve **health**. Collaborate to achieve success, **your goal is our goal.**

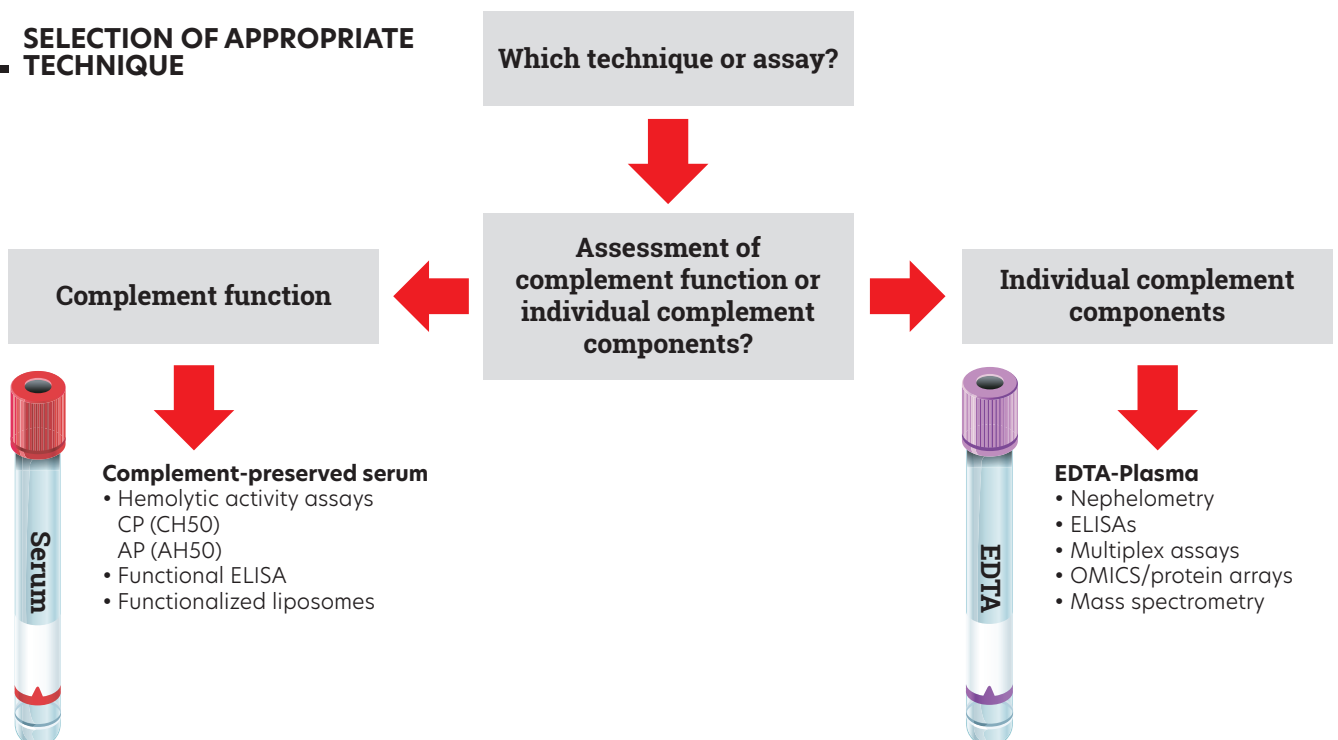

# Flowchart

Use the flowchart for the selection of: A) The appropriate sample type or B) The appropriate technique for the assessment of complement.

## A. SELECTION OF APPROPRIATE SAMPLE TYPE

## B. SELECTION OF APPROPRIATE TECHNIQUE

# General Introduction

As a leading developer and manufacturer of complement research tools, we take pride in our work. Our mission has always been to find answers to your questions and work towards improving health. We have been fulfilling this mission since 1994.

Our team possesses extensive expertise in the development and production of assays, antibodies, and proteins. We are committed to supporting scientists worldwide in their research on human diseases.

## Complement

The complement system is a crucial part of the immune system, consisting of a group of proteins that work together to defend the body against infections and support immune responses. It plays a pivotal role in recognizing and eliminating pathogens, promoting inflammation, and facilitating the removal of cellular debris.

Research on the complement system is vital for several reasons. Firstly, it helps in understanding its complex interactions with other components of the immune system, shedding light on the mechanisms behind immune responses. Secondly, studying the complement system aids in developing therapeutic strategies for various immune-related disorders and autoimmune diseases. Especially after the successful introduction of Eculizumab and C1-INH, more complement based therapeutics are approved for clinical trials or use.

Overall, comprehensive research on the complement system contributes to advancing immunology, paving the way for improved treatments and preventive measures for a wide range of health conditions.

At our headquarters in Uden, we, as a privately-owned company, undertake the development, manufacturing, and storage of our products. Our offerings are accessible via our Dutch headquarters, sales office in Wayne (PA) USA, and through our network of over 65 distributors present in over 50 countries.

Since 2008, we have maintained our EN ISO 13485:2016 certification, demonstrating our commitment to meeting the highest standards in the industry.

Take advantage of our dedicated support team for any technical assistance you need while using our products or considering them for your research needs. Contact us directly at [support@hycultbiotech.com](mailto:support@hycultbiotech.com) and let us help you make the most of your scientific endeavors.

## What we stand for

- In-house development, production of antibodies and assays
- High quality products for reliable measurements and reproducibility
- Specialized, independent and professional support
- Experts in complement
- Collaboration in scientific projects
