

Molecular Biology Kits

Reddot Biotech offers a wide range of kits and reagents for all your molecular biology research needs. We carry isolation kits for a variety of different sample types using 3 different types of technology. We also have other supplementary reagents including DNA and protein ladders, western blotting reagents, and PCR kits. All our molecular biology products are easy to use and do not contain toxic ingredients.

Isolation Kits

Extract and purify DNA and/or RNA from a variety of samples with the technology that's right for your experiment.

Column Based

- Simple, spin-through procedure
- Dual reagent and spin column methods available
- Silica gel membrane technology

Magnetic Bead Based

- Simple procedure
- Suitable for 7 different sample types
- Magnetic bead technology

Reagent Based

- Simple reagent only procedure
- Suitable for 5 different sample types
- DNA precipitation technology

Plasmid Prep

- Simple spin-through procedure
- Available for 3 different sample sizes
- Silica gel membrane technology

Proteomics and More

Find other high quality proteomics reagents you need to complete your experiments.

Western Substrates

- Chemiluminescent western blot substrates
- Two size options
- Low picogram to low femtogram sensitivity

Protein Ladders

- All Protein Ladders are ready to use
- 7 different size options
- Stained and unstained ladders available

DNA Ladders

- All DNA Ladders are ready to use
- 6 different size options
- Stained and fluorescent dye ladders available

PCR Products

- MasterMixes for qPCR and reverse transcriptase qPCR
- Highly compatible with other PCR systems

Hycultec GmbH

für Forschungsreagenzien
und Vials & Boxes

Vilshofener Str. 35
D-94501 Beutelsbach

Reddot Biotech Isolation Kits

	Column Kits	Magnetic Bead Kits	Reagent Kits	Plasmid Prep Kits
DNA Isolation Sample types	Blood, cultured cells, tissue, virus plant, fungus, paraffin-embedded tissue	Buffy coat, tissue, bacteria, virus, plant, blood, cells	Blood, cultured cells, tissue, plant, fungus	Plasmid
RNA Isolation Sample types	Virus, blood, cultured cells, fungus, plant, tissue	Virus	Blood, cultured cells, Tissue, Plant	N/A
Storage	Room temperature	Room temperature	Room temperature	Room temperature
Isolation Technology	Silica gel membrane	Magnetic beads	DNA precipitation	Silica gel membrane
Target Catalogue	12	6	5	3
Shelf Life	18 months	18 months	18 months	18 months
